RMS pumptools

SPEEDFiT

Split Phase Field Attachable

RMSpumptools SPEEDFiT is the new benchmark for high-speed, consistently reliable field installations of downhole cable to wellhead and packer penetrators - saving you even more rig time. Requiring minimal parts and training, just a cable prep is required - SPEEDFiT requires no epoxy, no gel and no assembly of parts.

SPEEDFiT is easily adaptable for use with different size cables, resulting in simple redress for re-use with only a minimum of spares required. The system variations suit different tubing sizes and can be adapted to different hanger profiles and existing equipment.

Minimal Space required to suit Tight Bores and Ultra Fast Assembly Time in the Field

Electrical Specification - (values may differ depending on model and materials)

Maximum Voltage:	5 kVAC
Maximum Working Current:	180 A
Maximum Working Temperature:	150°C (302°F)
Maximum Working Pressure:	5,000 psi
Maximum H_2S:	40%
Maximum CO_2:	90%

Key Performance Features

Simple, Reliable, Efficient
No Epoxy and No Gel
Minimal Assembly of Parts
Saves Significant Rig Time
Full Range to fit all Cable Sizes
ATEX/IECEx Certified
Max OD of FA Connectors: 31mm
Plug and Play Style Assembly
Dual Sealing - retains the exclusive Field Proven RMSpumptools Pressure Barrier
Incorporates a combination of metal and elastomeric seals
Fully testable after being installed on the Cable

Experience

The industry's unchallenged number one choice for reliability. Exclusive supplier to the demanding North Sea market for over 20 years.

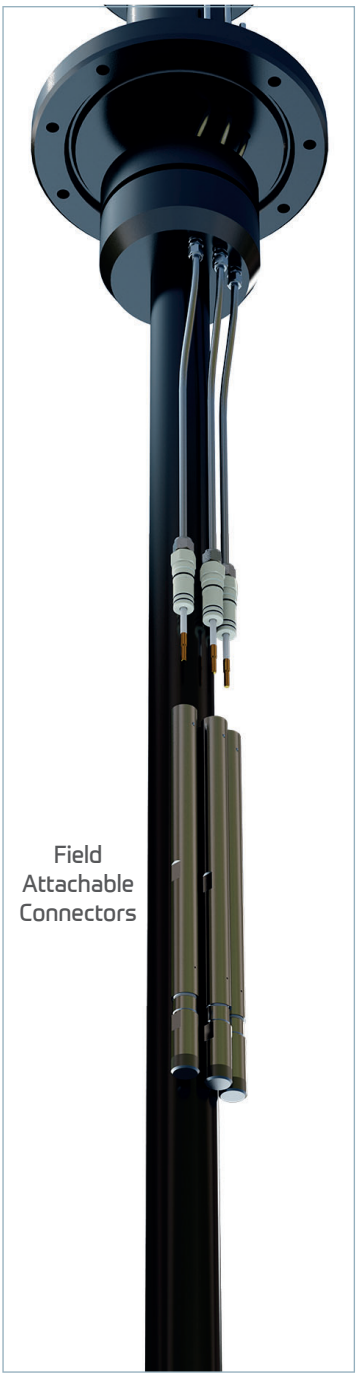
SPEEDFIT

Simple 3 Stage Installation

STAGE 1
Insert the Cable Jumpers into the Tubing Hanger and swage in the correct position.



STAGE 2
Attach the Split-Phase Field Attachable Connectors to the Cable Jumpers.

STAGE 3
Prepare the downhole cable and store the Breakout Box on the cable, then insert the cable into the Field Attachable Connectors.
